**Privacy Policy Sellics Vendor Chrome extension**

**What personal information we collect and how we collect it:**

Sellics Vendor Chrome extension is used for integration of Sellics Vendor Edition accounts with their Vendor Central accounts. Reports accessible in Vendor Central are extracted and sent to the corresponding Vendor Edition account in order to make them accessible in our tool only and only for the account that entrusted with the permission for integration with Vendor Central. The entire communication with the Sellics Vendor Edition backend is encrypted using https protocol and each request is authenticated.

In order to use the Sellics Vendor extension users need to login to the Sellics Vendor extension with their existing Sellics Vendor Edition account credentials for which they need to accept the Sellics Terms and Conditions which can be found here. In the T&C Sellics guarantees to non disclose and securely save, all user data that is being processed.

With the credentials from the Vendor Edition account the customer needs to log in the Sellics chrome plugin:

The following credentials are necessary to log in:

- E-Mail
- password

For non Sellics customers this chrome extension is not usable.

**How we use the personal information**

The personal information is only used to login purpose so we can match the customers existing Sellics Vendor Edition account with the chrome plugin.

The Customer and Sellics work together in a spirit of trust. This already applies to pre-contractual contacts and negotiations. The parties shall in each case take the interests of the other party into account and undertake to maintain confidentiality.

The persons entrusted by Sellics with the execution of the contract are bound to secrecy and data confidentiality.

Customer entrusts Sellics with access to and analysis of significant and sensitive business data, such as sales and product data. Sellics' staff may access and analyse the data, in particular to provide support for Customer. Sellics is fully aware of the sensitive nature of the data and undertakes to keep such data strictly confidential and to only use such confidential data for the execution of this contract and the fulfilment of its obligations under this contract. Sellics undertakes to keep all data and information received from the Customer confidential and not to transmit or otherwise disclose the data and information to third parties. All Sellics' staff is explicitly bound to secrecy and, in case of a breach of secrecy, is obliged to pay large contractual penalties. All rights of the customer to the data remain unaffected.

As the sole exception to the general rule above and only for the purpose of improving the services provided by Sellics, Sellics has the right to conduct statistical evaluations and analysis of all business data provided to Sellics, but only after such data has been aggregated and anonymized. Sellics will ensure at all times, that it is impossible to draw any direct conclusions between such aggregated and anonymized data and the Customer's business and that no business secrets of the Customer, such as in particular profit margins and revenue, will be disclosed by such evaluation, analysis or any other means to third parties.

**How do we protect this personal data?**

Sellics collects, processes and uses the Customer's personal data to maintain contact with Customer and to execute the contractual relationship. Refer to Sellics' special privacy policy for details.

Sellics provides the services by way of contract data processing, as far as personal data is concerned. In this respect, the Customer is the client. Sellics shall perform the services as instructed by the Customer. The Customer undertakes to conclude with Sellics the agreement on order data processing contained in the respective individual contract, in which further details are regulated in accordance with the statutory requirements of data protection law.

**Are there any third parties with access the data?**

Data is being stored on Amazon AWS. However the data is not being shared with any third parties.

**How customers can control this collection/use?**

Customers can at any time delete their account and with termination data is being deleted from database and collection of data via the chrome extension is stopped.
